

1. What is the difference between the browsers chrome and Firefox?

Firefox: Firefox is free and most of the time people around the world use the Firefox and also Firefox is open-source web browser that provides a number of features for easy web browsing, Firefox development was done by Mozilla Foundation. But Google chrome goes to Google Lnc, Firefox is much older than Google Chrome, in both of them we can using many languages like JavaScript, C, C++, etc., but I am not sure we can use Java Script in Google Chromes or not but both of them is amazing, and about Google Chrome is a free web browser but it is not open source,

2. Which browser are you using currently? Why?

I use Firefox and chromes , I use Google chromes because it is free Web browser and it help me to solve my problem very easy, and about Firefox when I use Firefox , for example when I want to watch a movie and do anther works I don't want to anther people see my activities that time I use Firefox . Because it related my situation what I want, and most of the time I use chromes. Both are great for me.

3. List the best known browsers. This is the best browsers around the world people's use.

- 1) Firefox
- 2) Google Chrome
- 3) Microsoft Edge
- 4) Apple Safari
- 5) Opera
- 6) Brave

4. Private browsing is a privacy property for some web browsers when my browse is in privately Chrome cant not save my browsing history and cookies, site data or anther information. Every browser have private browsing, when operating in such a mode, the browser creates a temporary session that is isolated from the browser's main session and user data. While private browsing does hide your immediate past online activity, and when my browse privately other people who use the device cannot see my history and Chrome

does not save my browsing history or information entered in forms. I want to use private browsing because I Want to keep my work and personally life separate and I just want to limit the amount of data for example companies collect about me and I value my privacy.

5. What is using browser profile:

the using of browser profile first of all I want to say and write about User profiles and what is user profile? User profile is a browser are like user accounts on a computer. They let multiple people use the same web browser while also letting them maintain privacy and personal settings. Popular browsers like Chrome, Firefox, and that kind of Browser support user profiles. When I want to go in my browser for example one History or one cookies I give specific permission to Include in my profile after that when I want to open that cookies or History that give permission for you. Each of these programs have a mobile counterpart, too, but their apps don't let you create a new browser profile for separate people.
